**Accomplishments:** Pioneered and developed numerous techniques or methods in operative laparoscopy. For example the technique of Videolaparoscopy which revolutionized modern day surgery. (Nezhat C. Videolaseroscopy: a new modality for the treatment of diseases of the reproductive organs. Colposc Gynecol Laser Surg 1986; 2: 221-4).

"If there was a single factor that contributed to this increased interest in laparoscopic surgery, it was undoubtedly the incorporation of video equipment as an integral part of the standard endoscopic set which was pioneered and promulgated by Dr. Camran Nezhat." (Tadir Y, Fisch B., Operative Laparoscopy: A challenge for general gynecology? Am J Obstet Gynecol 1993; 169:7-12 Tadir, Y, Operative Gynecologic Laparoscopy; Principles and Techniques, McGraw-Hill; 2<sup>nd</sup> Ed 2000: p ix.)

"Nezhat's contribution was and is almost unique. He has developed such facility with the technique in the operating room that he serves as a mentor for other physicians, challenging us to learn the new technique by showing us not only the art of the possible, but the tremendous advantage minimal-access surgery offers. When you watch him operate, you have to cast off the excuse, 'This procedure can't be done using video

laparoscopy," and, "...the introduction of videolaparoscopy and videolaseroscopy by Nezhat allowed the involvement of the entire operating team in the surgery." (Polan, ML, Endometriosis: Advanced Techniques and Surgical Management, Springer Verlag; 1995: p. ix)
