Dr. Camran Nezhat  
900 Welch Road, Ste 403  
Palo Alto, CA 94304

Dear Dr. Nezhat:

This is a very late note of thanks for your skilled treatment of me back in early 2009. In late March 2009 you performed a laparoscopy on me for endometriosis. To refresh your memory, I was the patient who had had two consecutive miscarriages prior to your surgery with the recommendation by Dr. Thomas Hilgers of the Pope Paul VI Institute in Omaha, Nebraska that I be treated for probable endometriosis. While my symptoms were not obvious, you were gracious enough to treat me and did find a certain amount of endometriosis. I recovered splendidly from your surgery.

I went on to become pregnant in the fall of 2009 and gave birth to a beautiful and healthy baby boy on May 27, 2010, Thomas Christopher [REDACTED]. He is two months old today. We enclose two photos of him.

We are extremely appreciative to you and your staff for your excellent care. We also attribute Thomas' birth, at least in part, to your successful treatment of my endometriosis. Please convey my gratitude to your associates who were involved in my case, if that is possible.

My husband picked out a very modest token of our appreciation, an unusual book on intelligent design that a scientist like you might enjoy. As Christians we do believe in a personal and loving God who has designed this marvelous and intricate world that we live in. We hope that the book is at least intellectually stimulating.

Thank you again for your outstanding medical treatment and for making our Thomas possible.

Appreciatively,

S. [REDACTED]
