

Dr. Nezhat,

We would like to share our gratitude with you for the urgency & care you provided in treating my endometriosis.

We did not know it was possible to have severe endometriosis without acute pain. With your diagnosis & prompt laparoscopy, my FET following surgery went very well.

We are overjoyed to share that we are now 13 weeks pregnant with our baby boy!

We thank you from the bottom of our hearts for it is due to your expertise & treatment that we were finally able to conceive.

...so very much.

You've inspired us to get involved with EndoFund & to continue raising awareness for endometriosis.

Thank you so very much,
Amot Mathradas &
Monique Gill
