

Dr. Nezhath.

Happy holidays! Ehsun and I have a lot to be grateful for this year and one of the many things is you. Thank you for your care, guidance, and expertise over this last year.

After 3 years of trying to get pregnant, I could have never

imagined that an endometriosis diagnosis (and surgery) would be the

eventual answer to our prayers. Thank you for all you do to educate and treat

others on endometriosis. Your work

has truly changed our lives. We are

now nearly sixteen weeks pregnant with

our baby girl. Forgive me and can't wait for

you to meet her next year. We hope

you enjoy the holiday season with your

loved ones wishing you all the best.

-Monica & Ehsun Forgany

*There's the rub.* How often do we use this expression to imply tension? Color contrast, a matter of science and perception, is a rub of sorts—and one we can use to enliven designs. The complementary colors (yellow/violet, red/green, and blue/orange) create energy when juxtaposed. Look to the floral works of the impressionists for inspiration.
