

I was diagnosed w/ endo in May 2017 and attend my first Endo March that same year in March. I heard you speak, listened to your patient testimonies & was moved by how much life & hope you gave back to people. When I realized I would not be able to conceive w/ someone who understood my condition, I did everything in my power to see you - changed jobs, changed insurance plans, commuted 1 hour ^{each trip} because I know you knew how to help me.

March 2022

Dear Dr. Nezhad,

... also, Happy Endometriosis Awareness Month!

thank you so much

Meeting you has been the best experience of care & knowledge to treat my endometriosis. Thank you for treating me like a human being w/ valid pain and not like someone making things up in my head.

You have helped my husband, Nick, and I reach our goal of having a family. Thank you for your continued care & dedication not only to me, but anyone diagnosed w/ endometriosis looking for help. It has been an honor to be your patient & receive world class treatment!

Forever grateful
